

Pest Control Notice

Bedbug Preparation / Treatment

Day & Time Scheduled: _____

TREATMENT

Your home will be treated either for preventative reasons or to address a current bed bug concern in the building. The treatment will be performed with the most modern & safe products. The entire home will be treated (all furniture at once) to ensure the problem is resolved. It is important to treat all areas at the same time. ALL products that will be used are LABELED for use inside and will be as safe as possible.

PREPARATION

Do not throw away any furniture. Almost all furniture can be treated without damaging or disposing of it. Do not bag or wrap any furniture – please leave it as is & bare for treatment.

On the day of treatment, remove all bedding & items from all furniture. It is recommended to launder (any high-heat cycle) all bedding that has been in contact with the beds and sleeping surfaces. Please collect all items, toys, articles from the floors and away from walls & vacuum floors prior to treatment. All living spaces will be treated.

PETS : Either remove pets during treatment or kennel/place them in non-treatment areas (bathroom etc) for safety.

RE-ENTRY

- Per label allow 2-3 hours for treatment before re-entering the home.
- Put clean sheets and pillows on each bed before sleeping on them after they are dry.
- Do not introduce new furniture into the home until treatment regime is completed.
- Do not treat the home with over-the-counter products (NO Home Depot, Walmart, Lowe's products please) as this may interfere with the treatment.
