

Dear Valued Resident,

We have had a report that one of your surrounding neighbors might have Bed Bugs. We are being proactive and inspecting the surrounding units to ensure they are taken care of and avoid bedbugs in your home. Therefore our Professional Pest Control Company will be out on to perform an inspection. Please help us by removing the sheets from your bedding and pulling your bed frame a foot away from the wall. Should you have any pets in your home, please make sure they are secured in a crate or bathroom .

Our professional Pest Control company will be spraying a non-toxic chemical around the interior walls of your home. Should we discover that you have evidence of bedbugs in your home, we will treat you immediately and give you the follow up procedures. Again, this is just a preventive inspection/pretreatment.

Should you have any questions or concerns please feel free to contact Management.

Sincerely,

Community Manager
